

HACCP

Close the Information gap in your Cold Chain and meet all HACCP Guidelines!

X2 recorders make compliance easy and are certified to meet and conform to the world's most stringent food safety laws and regulations.

X2 Temperature Recorders
HACCP Compliance
during Transport

Comply with ...

- US HACCP Guidelines
- US FDA/CFSAN & ISSC - Model Ordinance IX (Transport of Molluscan Shellfish)

Certified to ...

- EN 12830, Class 1 (EU Temperature Recorder Standard)
- 92/1/EEC (Technical Directive)
- TLMV (German Food Directive)
- "e-4 type approval" to 95/54/EEC
- ISO 9001 : 2000 (TUV certified)

Conforms to ...

- HACCP (EU Standard / Law since 1997)
- EN 13486, Class 1
- 37/2005
- 852/2004
- 93/43/EEC (EU Food Hygiene Directive)

HACCP Guidelines ...

In 1959 NASA's quest for 100% safe Astronaut food brought to life what is now known as HACCP. Since that day the US has taken a leading role developing this food safety concept which was adopted, strengthened and enforced in the European Union in 1997 and has been accepted worldwide as the leading standard to assure food safety throughout the entire Cold Chain.

American, due to its European origin, has become an expert in dealing, meeting and exceeding the world most stringent food safety laws, directives and guidelines in the Temperature Controlled Transport Industry. Our X2 recorders have been especially engineered to easily and affectively comply with HACCP guidelines in the often overlooked, yet absolutely critical, transportation portion of the food chain.

The Ameriscan X2 Recorders HACCP specific capabilities include:

- Long-term data storage
- Independent Temperature Sensors
- Independent Data Recording Device
- Paper, Time and Temperature Chart
- et al.
