

## AmeriBASE

Optimum operations management, with modular software solutions.

Improve your analysis of business critical data and at the same time enhance your customer service.

Modular software solutions for all Ameriscan 'RX/TX' range of Temperature recorders

# AmeriBASE

## Key Features

- Centralized data archiving
- Access all data through Microsoft® Windows® based client software as well as web-based client interface.
- Customized exception reports, based on rules which can be defined to apply to your specific requirements
- Real-time\* monitoring and vehicle positioning
- Mobile status, messaging and alarms, defined by a flexible rule set

\* Real-time monitoring is limited to the range and availability of communication option(s).

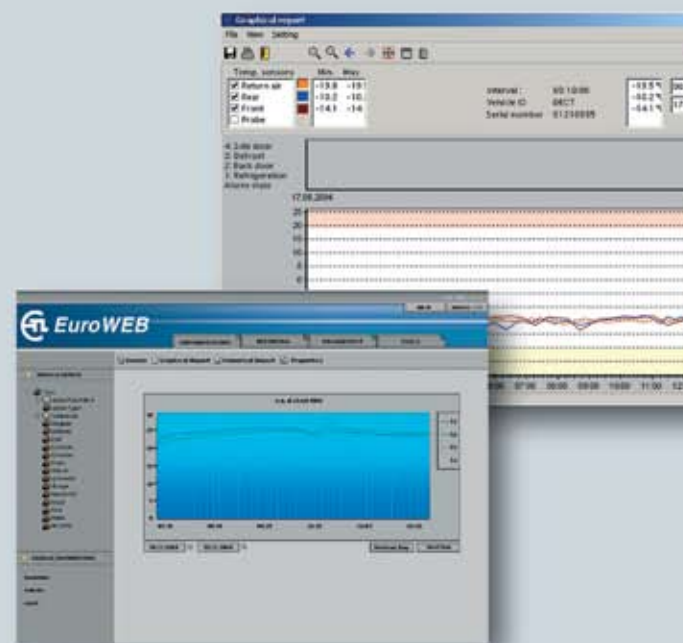

## Benefits

### For you

- Improved time saving, due to centralized data access
- All data available anytime, anywhere, to all designated employees
- Optimized analysis procedures help ensure the quality of your products
- Automated data archiving as well as documentation and presentation, help you to comply with both internal and external quality requirements and at the same time, ensure you comply with both national and international legislation.
- Enhanced services will help you to improve your position in the market place
- Microsoft® Windows® based client-/server software give you both multi-user, as well as multi-site support
- Allow customer access to only the vehicles which are containing their goods.

### For your customers

- Complete Supplier confidence by having access to all relevant data (i.e. Temperature, status, location, etc.) viewable at any time.
- Data can be viewed through any Internet enabled PC connected to our Web-based software

## **AmeriCOM**

Automatic Temperature  
Monitoring 24/7  
Wherever you are !

Modular Plug & Play  
Communications options  
for all Ameriscan 'RX/TX' range of  
Temperature recorders

# AmeriCOM

Ameriscan offers you various modular solutions for its temperature recorders. Off-loading of data can either be carried out whilst the vehicle is stationary, automatically when entering the depot, or in real-time during transport.

See below for the solution best suited to your operation:

#### **Module 1: Stationary (Off-Line)**

Data transfer via InfraCON / Bluetooth communication

- Off-loading of data for central data storage & analysis
- PC Programming of all recorder settings
- Suitable for smaller fleets with a few vehicles

#### **Module 2: In the depot (Off/On-Line)**

Data transfer via modern communication technology (AmeriDECT, Bluetooth, W-LAN)

- Full automatic data transfer when vehicle in range
- Automatic temperature/door alarm function whilst in range
- On-line Temperature data available whilst at the Depot
- Central data storage & analysis

#### **Module 3: On the road (On-Line)**

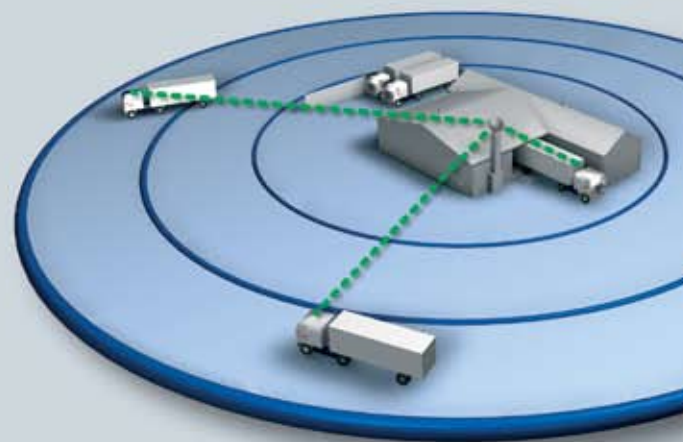

Data transfer via GSM/GPRS communication

- Automated data transfer
- Automated alarm function via mobile phone
- Real-time availability of data
- Central data storage
- Data access via AmeriBASE from any Internet enabled PC

All Ameriscan communication products are tested and approved to **R&TTE Directive 1999/5/EC**

#### **Your advantages:**

- automatic compliance with the new food industry quality standards including ISO9000, HACCP, 178/2002/EU New General Food Law
- increase your customer satisfaction
- a reduction of operating costs due to the risks associated with liability
- receiving a better grading with insurance providers
- reduction of labour costs
- quick amortization of the investment costs

You too can take advantage & benefit, from the know how of a World class market leader in the area of mobile Temperature recording for Conditioned & Controlled Atmosphere Transport.

For more information please contact our US sales and contact office in Salisbury, MD. Alternatively, contact your local authorized dealer.

Optimize your operations, save time and money and never lose data again!

Create a win-win-win situation for Producers, Transporters and Customers.

X2 Temperature Recorders  
The 21st Century answer to  
Data Logging

#### Key Features

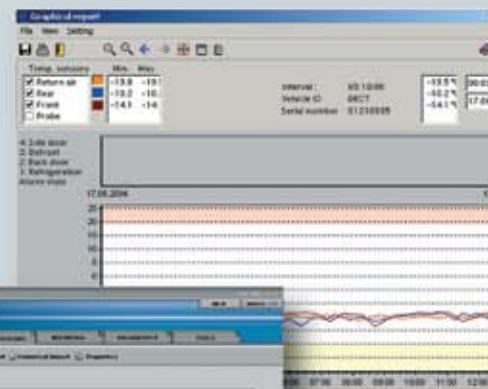

- Permanently Installed and long-lasting Data Logger
- Ideal for Multiple-Compartment trucks
- Access data from virtually anywhere and print a delivery ticket in seconds
- Build in memory stores data for up to 3 years - never lose data again
- Save money with every load you ship for years to come
- Measure Ambient & Product Air to ensure correct air circulation
- Alarm and Event reporting
- Cabin or Trailer mounted units available
- Modular design allows for cost effective system upgrades, if desired
- State of the art technology, that can include Bluetooth, GPS and GPRS IT solutions
- HACCP, EU & ISO conform recorders
- 5 to 7 year Product Life Span

Note: Real-time monitoring is limited to the range and availability of communication option(s).

#### Benefits

- Save Costs instantly and stop spending thousands of dollars a year to equip a single trailer with throw-away data loggers
  - Multiple Data storage and retrieval opportunities:
    - the X2 Unit (which has 3 years of data storage)
    - your computers
    - our servers
  - Save up to 12 min. on every delivery and QC check-point
  - Stop buying thousands upon thousands of Data Loggers a year, and improve your business by doing so
  - Give your customers access to their load information
  - Be pro-active vs. re-active & prevent possible load loss or quality and temperature issues before it is to late
  - Proof of Correct Temperature on, or prior to, Delivery to ensure defence of 'due diligence' in case of food loss or any other legal disputes
  - Partial load recovery possible
- With Ameriscan and the X2 everyone benefits, dare to find out how!

## **AmeriTRACE**

Do you know where your valuable load is right now ?  
Is your route planning optimised to give you maximum efficiency ?

AmeriTRACE will support you in realising your needs !

A Plug & Play modular extension  
for all Ameriscan 'RX/TX' range of  
Temperature recorders

# AmeriTRACE

The American system solution for tracking your vehicle and load

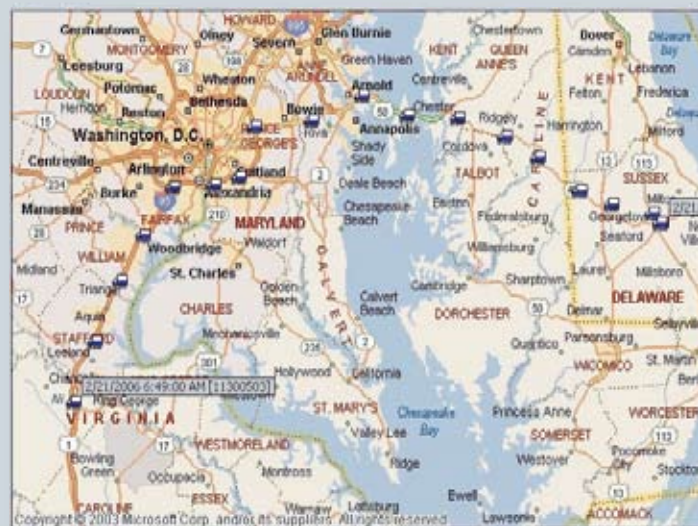

#### AmeriTRACE

- Real time accurate positioning of your vehicles on a digital map, including the Temperature condition of your load.
- Historical routing available at your finger tips.
- Proof of on-time delivery to your demanding customers
- Positioning available in both 'Windows PC network' and in our 'AmeriWEB' interface, or if required in a combined solution.
- Give your customers remote access to Temperature data on their dedicated vehicles using AmeriWEB. The drag and drop function allows easy and secure management of all their data.

#### American AmeriTRACE

AmeriTRACE is a Plug & Play extension module which can be used in combination with any American 'RX/TX' Temperature recorder, whether on first installation, or retro-fitted in the field afterwards.

A full system consists of a GPS receiver integrated into the Temperature recorder and connected to one of the American AmeriCOM communication systems, together with the AmeriBASE software.

#### AmeriCOM modular solutions

- GSM/GPRS communication ✓
- Digital mid-range radio communication ✓
- Infra red/Bluetooth data transfer ✓
- Monitoring software with full automatic alarm functions ✓
- Software analysis and long term data storage ✓
